

CS571 Spring 2025 – ICA H

Mobile Design

Please *make a copy* of this document by clicking **File > Make a copy**. You may share and co-edit it with your fellow group members.

In this in-class activity, you will explore the concept of **Mobile Design** in two steps:

1. Analyze Mobile Micro Interactions
2. Analyze Mobile Design Patterns

Areas needing your response are clearly marked with **Your Turn!** Be sure to complete all aspects of the assignment. Your Canvas submission will be a **pdf** version of this document.

You may complete this in groups of 1, 2, or 3 people! :) Please be sure to assign yourself and your team member(s) to a group.

1. Analyze Mobile Micro Interactions

You just learned about *microinteractions*; although subtle, they play an important role in improving the user experience.

Your Turn! Considering what you just learned, analyze a mobile application of your choice and find a microinteraction.

- a. Briefly describe the microinteraction that you found. Include a screenshot annotating where the microinteraction occurs.
- b. Breaking down the microinteraction into its four elements; describe each of the following...
 - i. Element 1 – Trigger
 - ii. Element 2 – Rules
 - iii. Element 3 – Feedback
 - iv. Element 4 – Loops and Modes

2. Analyze Mobile Design Patterns

Now you have learned design patterns for mobile applications. In this activity, you will find and showcase uses of design patterns.

Your Turn! Answer the following questions.... **Be sure to complete both (a) and (b).**

- a. For each design pattern below, take a screenshot from a mobile app that uses this design pattern and annotate its usage. Then, paste it into the table. *You may reuse screenshots, but please be sure to update your annotations.*

Design Patterns	Example Screenshot & Annotation
Stacks	
Drawers	
Lists & Grids	
Swimlanes	
Card	
Bars	
Search, sorting, filtering	
Landing pages, guided tours	
Direct Manipulations	
Panes & Panels	
AR/VR	

- b. Reflect on this activity. If you were to implement BadgerChat as a mobile app, what sort of design patterns would you use, and how would you use them? You don't need to comment on each design pattern, though you should describe at least 3 - 4 patterns that you would use.

After completing this document, please be sure to upload it as a PDF in Canvas!
